Revelation 911: How the Book of Revelation Intersects with Today's Headlines

NEW—By Paul Begley and Troy Anderson. A riveting account of current events as foretold in the mysterious Book of Revelation. Are we teetering on the edge of the End Times? Look at the daily news and you'll see stories about plague, famine, unexplained deaths, artificial intelligence, looming nuclear war, inflation, transhumanism, wokeness, cancel culture, gender identity crises, and mass shootings. Is this the end of the world? Or are these just precursors to the end of the world? To answer that question, biblical prophecy expert Paul Begley and former investigative journalist Troy Anderson team up to compare today's headlines with the events foretold in the book of Revelation. Their findings? Not only are signs of the End Times accelerating dramatically, but a catastrophic economic collapse and global conflagration could be the next major events on the prophetic timeline before the rise of the Anti-Christ, the emergence of the False Prophet, and the installation of the "Mark of the Beast" economic system. They also explore evidence linking the popular transhumanist movement, artificial intelligence, and top-secret government and military programs with prophecies of the last days. *Revelation 911*

offers hope and comfort through the power, protection, and provision of the Holy Spirit. Many believe these cataclysmic shakings will be accompanied by the greatest awakening in history, as the world races toward the return of Christ, who will defeat the powers of darkness at the Battle of Armageddon. Hardback, 288 pages, \$25.

Christianity and Wokeness

NEW—The "wokeness" that emerged from the social unrest of 2020 has swept through schools, businesses, and even sports. Driven by the radical ideologies of critical race theory and intersectionality, it has destabilized public and private life—including the church. Many evangelicals have joined the crusade. Gripped by a desire for justice and rightly grieved by past evils like slavery, many pastors are preaching the woke gospel—identifying "whiteness" (an imaginary concept) with "white supremacy," calling bewildered Christians to repent of their supposed guilt for the sins of past generations. But, as theologian Owen Strachan makes clear, this is not true justice, nor is it true Christianity. While wokeness employs biblical vocabulary and concepts, it is an alternative religion, far from Christianity in both its methods and its fruit. A potent blend of racism, paganism, and grievance, wokeness encourages

"partiality" and undermines the unifying work of the Holy Spirit. It is not simply not the Gospel—it is anti-Gospel. Strachan traces the origins of wokeness, lays out its premises, and follows them to their logical conclusions. This succinct but groundbreaking work reveals that wokeness, like other heresies, is not really new. Softcover, 224 pages, \$20.

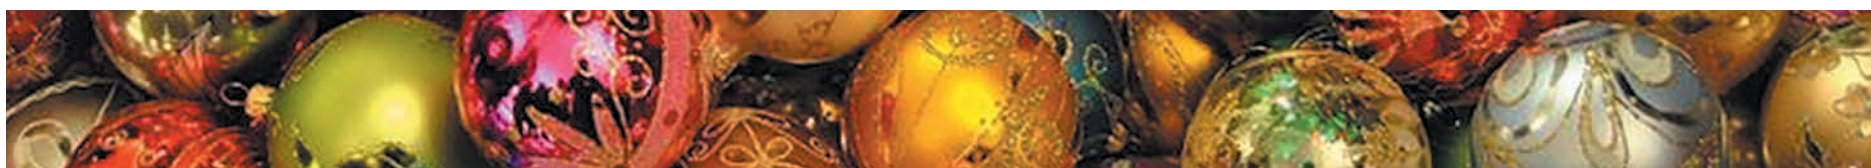

The Unprotected Class: How Anti-White Racism Is Destroying America

NEW—Anti-white racism, undisguised and unembarrassed, is now official policy in America. One class of citizens—whites—is openly discriminated against in every sphere of public and private life. *The Unprotected Class* is a comprehensive explanation of how we got here and what we must do to correct a manifest—and dangerous—injustice. Launched with an appeal to justice for all, the civil rights movement went off the rails even as it achieved its original goals. Soon its excesses and failures were exploited to justify discrimination against whites in business, education, law, entertainment, and even the church. Upon the death of George Floyd, all pretense of racial justice was scorned and vindictiveness, resentment, and hatred were unleashed in America. Hardback, 400 pages, \$33.

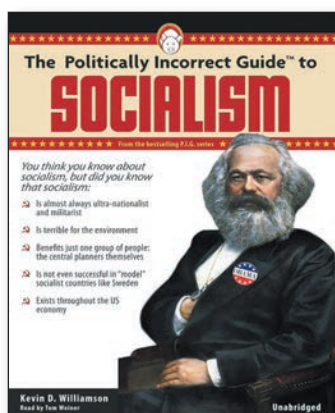

Hoodwinked: 10 Lies Americans Believe and the Truth That Will Set Them Free

NEW—Foreword by Charlie Kirk. Ten lies dominate American public life, so the time is right for some explosive truth-telling. Millions of Americans have fallen for 10 big lies about God, man, and our country. These false dogmas, ferociously enforced, are bringing our country to its knees. Pastor John Amanchukwu is determined to smash these lies. His compelling stand against gender ideology and race-baiting at school board meetings across the country has attracted a huge online audience and made him a leading voice for biblical justice. In this powerful new book, Amanchukwu names the 10 lies that have beguiled our country and takes them apart piece by piece. They are: 1) America is a racist nation; 2) Being against abortion is only a white view; 3) Capitalism is to blame for poverty; 4) Christianity is the white man's religion; 5) Debt can be canceled; 6) Disagreement equals hate; 7) Transgenders are under attack; 8) If you're anti-pornography, you're a book banner; 9) The Bible isn't political; and 10) The Church is non-essential. Lies are no match for the truth, but they won't go away by themselves. Hardback, 208 pages, \$33.

ADDED BY POPULAR DEMAND FROM AFP READERS: FIVE "POLITICALLY INCORRECT GUIDES"

The Politically Incorrect Guide to Socialism

NEW—If you thought socialism went into the dustbin of history with the collapse of the USSR, think again. Socialism is alive and kicking, and it's already spread further than you know. Stalin's gulag, impoverished North Korea, collapsing Cuba ... it's hard to name a dogma that has failed as spectacularly as socialism. Yet, leaders around the world continue to subject millions of people to this dysfunctional, violence-prone ideology. In *The Politically Incorrect Guide to Socialism*, Kevin Williamson reveals the fatal flaw that dooms all socialist economies. But, even in America, that hasn't stopped bureaucrats from planning the most vital sectors of our economy: public education, energy, and healthcare. In this provocative book, Williamson unfolds the grim history of socialism, showing how the ideology has spawned crushing poverty, devastating famines, and horrific wars. Lumbering from one crisis to the next, leaving a trail of economic devastation and environmental catastrophe along the way, socialism has wreaked more havoc, caused more deaths, and impoverished more people than any other ideology in history. Williamson further explains why: socialism in theory is no better than socialism in practice; socialism can't exist without capitalism; the energy powerhouse of Venezuela resorted to rationing and blackouts long ago; socialism, not British colonialism, plunged India's economy into stagnation; why socialism is inextricably linked to communism; and more. Softcover, 304 pages, \$22.

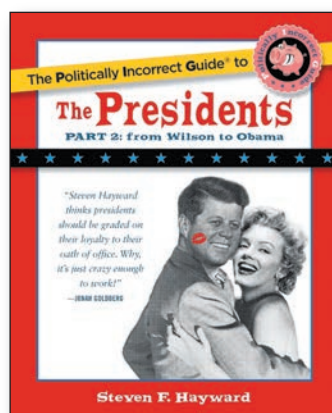

The Politically Incorrect Guide to the Presidents Part 1

NEW—Prof. Larry Schweikart is ready to set the record straight on the American presidents. He goes through each of the first 26 presidents from George Washington to William Howard Taft and debunks myths, lies, and fake news made fact by the Court Historians. Discover why Washington favored American isolationism; James Madison supported states' rights; what Lincoln promised to Southerners about fugitive slaves; and why 19th-century presidents were the last to understand the true role of government. So what made these presidents so much better than the ones America has now? Schweikart argues that recent commanders-in-chief have welcomed crises to advance their own partisan agenda, and defied the separation of powers the founders carefully constructed to preserve the republic. Softcover, 336 pages, \$22.

The Politically Incorrect Guide to the Presidents Part 2

NEW—Presidents should be graded on their loyalty to their oath of office, says government scholar Steven Hayward. In this book he debunks some of the biggest presidential myths Americans believe are facts. In *The Politically Incorrect Guide to the Presidents, Part 2*, he traces the legacy of each president from Wilson to Obama and, along the way, busts pervasive myths most Americans accept as truth. Was JFK assassinated by a communist? Did FDR

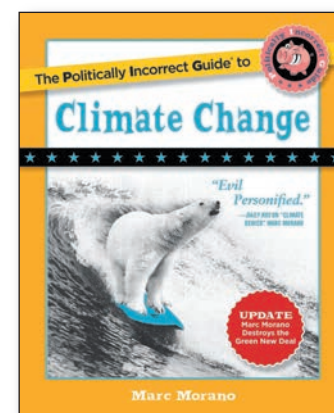

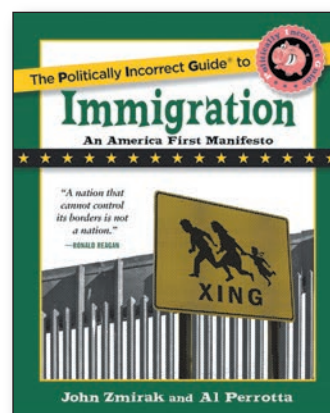

have the right to run against Herbert Hoover. Did Woodrow Wilson openly criticize the Constitution? As for the 2000 election did it, in fact, reach the correct outcome? Uncover new revelations about each president covered and prepare for an unvarnished look at the truth. Softcover, 307 pages, \$22.

The Politically Incorrect Guide to Immigration

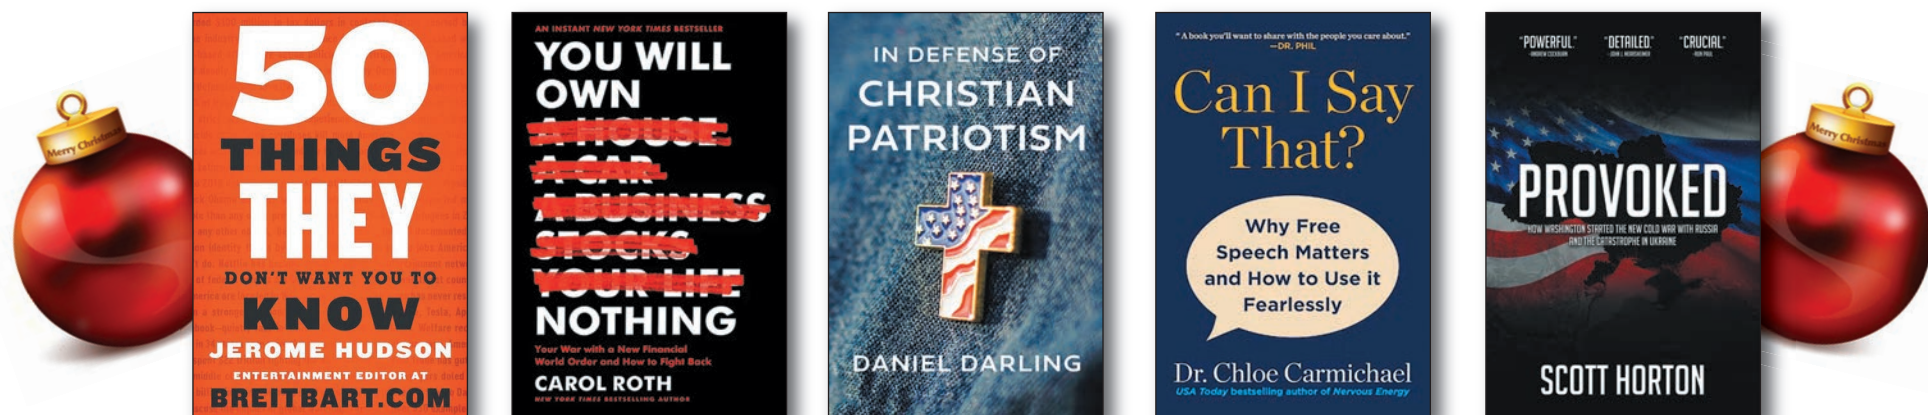

NEW—The shocking truth about illegal immigration! John Zmirak and Al Perrotta debunk the left's most deceptive myths on illegal immigration and reveal the huge implications that lie ahead for our nation's future. The authors insist: Building "The Wall" would cost less than half of what we spend to educate illegal immigrants every year; illegal immigration costs American taxpayers \$116 billion a year; millions of 19th-century immigrants who couldn't make it in America went back home; of the Central American women and girls who enter the United States illegally, 80% are raped along the way; competition from immigrants costs American worker \$450 billion a year; non-citizens are only 9% of our population but 27% of America's federal prisoners; and much more. Filled with real-life statistics, information, and targeted arguments.

The Politically Incorrect Guide to Climate Change

The climate scare ends with this book—updated to include a new section on the Green New Deal! This book arms every citizen with a comprehensive dossier on just how science, economics, and politics have been distorted and corrupted in the name of "saving the planet." Less freedom. More regulation. Higher costs. Make no mistake: those are the surefire consequences of the modern global warming campaign waged by political and cultural elites who have long ago abandoned fact-based science for dramatic fearmongering in order to push increased central planning. *The Politically Incorrect Guide to Climate Change* by Marc Morano gives a voice—backed by statistics, real-life stories, and incontrovertible evidence—to the millions of "deplorable" Americans skeptical about the multi-billion dollar "climate change" complex, whose claims have time and time again been proven wrong. Softcover, 200 pages, \$24.

50 Things They Don't Want You to Know

NEW—If you heard that one president deported more people than any other president, started the program of family separation, and did nothing to stop Russia's election meddling, would you guess it was Obama? Jerome Hudson dives deeply into the things Americans are not supposed to realize. Many of our most hotly debated topics are shaped by Davos powerbrokers, woke college professors, TV talking heads, social media activists, and feckless Washington swamp monsters who want you to only follow their narrative. Your teachers, your politicians, and your local paper are not likely to ever tell you: Black and Hispanic students are more underrepresented at America's top universities than before affirmative action; Hispanics constitute over half of Border Patrol agents; the U.S. settled more refugees in 2018 than any other nation; half of federal arrests are immigration-related; Amazon paid \$0 in taxes on \$11.2 billion in profits in 2018; taxpayers doled out \$2.6 billion in food stamps to dead people in less than two years; 1,700 private jets flew to Davos to discuss the impact of global warming; 90% of plastic waste comes from Asia and Africa; ... and much more! Once you're done reading *50 Things They Don't Want You to Know*, you'll never trust the powers that be to give you the whole truth ever again. Softcover, 336 pages, \$22.

You Will Own Nothing: Your War With a New Financial World Order

NEW—When Carol Roth first heard that one of the World Economic Forum's predictions for 2030 was "You will own nothing, and be happy," she thought it was an outlandish fantasy. Then, she researched it. What she

found was that the global elites share a vision of a future that sounds utopian: Everyone will have everything they need, and no one will own anything. From declines in home and vehicle ownership to global inflation and government spending, many of the trends of modern life reveal that a new world is emerging—one in which Western citizens increasingly do not own possessions or accumulate any wealth. It's the perfect economic environment for the rich and powerful to solidify their positions and prevent anyone else from getting ahead. Roth also reveals how the agendas of Wall Street, world governments, international organizations, socialist activists, and multinational corporations like Blackrock all work together to reduce the power of the dollar and prevent millions of Americans from taking control of their own wealth and success. She shows why owning fewer assets makes you poorer and less free. This book is an essential guide to protecting your hard-earned wealth. Hardback, 352 pages, \$32.

In Defense of Christian Patriotism

NEW—Since when does praying to Jesus, loving America, and saluting the flag make you an extremist? In this deeply-researched walkthrough of political theology and history, Daniel Darling defies the statue-toppling spirit of our age to recover a lost tradition of patriotism. He lays out why Christians should revere flags and civic heroes, and what it really looks like to bring Jesus into politics (it's not theocracy). You may be called a fascist. That's OK. When insanity is normal, the normal are deemed insane. The left claims Christian political engagement will produce a "real-life Handmaid's Tale," "the Afghan Taliban," and a "Christo-fascist future." In fact, the opposite is true. The Salvation Army and

the Southern Baptist Convention run the second- and third-biggest disaster relief organizations in the country. American substance abuse treatment programs—73% of them—include spiritual elements. Evangelicals are five times more likely to adopt than the average adult. And this is a tradition to be proud of. So why aren't Americans proud? Here is a joyful response to the cynics: stop lecturing the faithful. Instead, equip them. The book is a guide that arms ordinary Christian patriots to fight back against the left's false narratives with an upbeat, robust defense of how Christians make America better. Hardback, 288 pages, \$32.

Can I Say That? Why Free Speech Matters and How to Use It Fearlessly

NEW—Recommended by Dr. Phil McGraw. Speak freely—it's good for you! If you're like 84% of Americans, you think self-censorship and cancel culture are serious issues. You may feel like you're not free to speak your mind, or you worry that you'll be alienated for expressing opinions. Dr. Chloe Carmichael explains why and how to escape this cycle of anxiety and avoidance and start embracing our diversity of viewpoints. She unpacks the science behind open dialogue and why it's essential to the cognitive and emotional processes that create wellness. Chloe also offers simple, conversational techniques to help you express yourself freely, listen resiliently, and navigate so-

cially or emotionally charged conversations authentically with quiet confidence. We can talk to each other again and not tiptoe around tough topics. We can reconnect with family, friends and neighbors to enjoy respectful, meaningful conversations. We can disagree safely and productively—our mental health, social relationships, and even our democracy depend upon it! Hardback, 240 pages, \$33.

Provoked: How Washington Started the New Cold War With Russia and the Catastrophe in Ukraine

UPDATED—Over and over, U.S. government officials and their mainstream media allies called Russia's 2022 invasion of Ukraine an "unprovoked attack." The slogan became so overused that people began to ask the obvious question: Why do they protest so much? In *Provoked*, seasoned journalist and peace activist Scott Horton explains how, since the end of the last Cold War and the fall of the USSR, successive U.S. administrations pressed their advantage against the new Russia to the point it blew up into a war between Russia and Ukraine. From NATO expansion into Eastern Europe to "shock therapy" economic policies, the Balkan and Chechen wars, color-coded revolutions, new missile defense systems, assassinations, Russiagate, and ultimately the war in Ukraine, Horton shows what really happened and why it did not have to be this way. Softcover, 690 pages, \$35.
