Assassinations: The Plots, Politics, and Powers Behind History-Changing Murders

NEW! By Nick Redfern. Exposed are the hidden agendas. You will quickly find yourself immersed in a world that is filled with killings made to seem like suicides, murders that were designed to look like heart attacks or overdoses, and accidents that, in reality, were carefully orchestrated deaths. Did Oswald really kill JFK—or was he the patsy he claimed to be? Was Jack the Ripper a madman or a ruthless secret agent of the British government? Did the first U.S. secretary of defense, James Forrestal, kill himself, or was he pushed to his death? Did Marilyn take her own life or was a contract put out on her? What led to the demise of Danny Casolaro, an investigative journalist who, at the time of his death in 1991, was investigating a powerful cabal known as “The Octopus”? Was Princess Diana the victim of a car accident or a carefully orchestrated plot? Can sound waves and microwaves kill people? Was John Lennon’s murder what it appeared to be? These questions and many more are answered. Softcover, index, bibliography, 120 photos, 448 pages, \$16.

COVID-19 and the Agendas to Come, Red-Pilled

NEW! BANNED BY AMAZON! Drawing on statements of numerous scholars from around the world—virologists, epidemiologists, immunologists, pathologists, microbiologists, infectious disease specialists, including Nobel Prize winners, as well as front-line ER physicians and family practice MDs—veteran journalist James Perloff asks hard questions about the global response to Covid-19. Are the virus’s health risks greater than those posed

by lockdowns? What does the science say about masks and social distancing? Why were no lockdowns imposed for previous pandemics? How accurate are the death numbers? Is the virus natural, or could bio-engineering have played a role? Should the world’s population take a Covid vaccine? Why is Bill Gates formulating health policy, even though he has no medical credentials? How might a “second wave” be different? Is the Covid crisis being exploited to push us into a future of mass surveillance, digital IDs and cashless transactions? Find out for yourself! Softcover, 216 pages, \$16.

The 2001 Anthrax Deception: The Case for a Domestic Conspiracy

NEW! In 2001, anthrax letter attacks in the United States killed five people and wounded dozens. They were widely blamed on extremist Muslims and their backers and used to support the invasions of Afghanistan and Iraq. They were also used to justify and hasten the passage of the USA Patriot Act, which was being presented to Congress just as the first anthrax victim grew ill. In October 2001, one of the hypotheses that gained ground was that of the Double Perpetrator, the claim that al Qaeda was carrying out the attacks with the support of Iraq. Much evidence was put forth to support this Double Perpetrator theory, but independent scientists soon discovered that the anthrax spores came from a domestic lab in the U.S. serving the military and intelligence communities, not from al Qaeda or Iraq. The FBI then quickly claimed that an individual was responsible for the attacks and began noisily looking for this “lone wolf.” In 2008 the Bureau named Dr. Bruce Ivins of the U.S. Army Medical Institute of Infectious Disease as the “Anthrax Killer.” Although the FBI remains committed to the Ivins hypothesis, the case has been disintegrating ever since it was proposed. Currently, it is held in con-

tempt not merely by scientists who worked with Ivins but by many journalists as well as several U.S. senators. But this raises the question: If Ivins did not commit this crime, who did? Softcover, 189 pages, \$20.

In Their Own Words: The Democratic Party's Push for a Communist America

NEW! *In Their Own Words* answers an important question on the minds of many Americans: What is happening inside America’s Democrat Party? During the 1980s, before the collapse of the USSR, Democrat leaders like Bernie Sanders and Bill De Blasio were ardent supporters of Marxist Daniel Ortega and his Nicaraguan revolution. Ortega was allegedly “the man of the people,” intent on forming a socialist government of equality. Today Ortega crushes dissent from the people he “liberated,” joining Nicolas Maduro of Venezuela as just another “elected” dictator who has destroyed his country through the implementation of socialism. But who from the media is questioning the horrendous judgment of Sanders and De Blasio back then, as they actually push the same policies for America? *In Their Own Words* by Terry Turchie and Donagh Bracken shines the light on the insidious nature of socialism as the transformative step toward a “communist utopia.” The problem is that the “utopia” part never happens. This book explains why. Softcover, 390 pages, \$22.
